Vendor:Microsoft

Exam Code:AZ-302

Exam Name:Microsoft Azure Solutions Architect
Certification Transition

Version:Demo

QUESTION 1

HOTSPOT

You plan to deploy the backup policy shown in the following exhibit.

The screenshot shows the Azure Storage portal interface for a container named 'uneditedmedia'. The breadcrumb path is 'Home > Storage accounts > videostorageacc > Blobs > uneditedmedia'. The container name is 'uneditedmedia'. The location is 'uneditedmedia'. There is a search bar for blobs by prefix. A table lists the blobs:

NAME	MODIFIED	ACCESS TIER	BLOB TYPE	SIZE	LEASE STATE
rawfootage.avi	8/24/2018, 12:48:41 PM	Archive	Block blob	24.75 MB	Available

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

To access the files, you must [answer choice].

- generate a snapshot
- modify the access tier
- modify the blob type

The files will be stored [answer choice].

- at the highest storage cost
- at the lowest data retrieval cost
- at the lowest storage cost

Correct Answer:

To access the files, you must [answer choice].

- generate a snapshot
- modify the access tier
- modify the blob type

The files will be stored [answer choice].

- at the highest storage cost
- at the lowest data retrieval cost
- at the lowest storage cost

References: <https://docs.microsoft.com/en-us/azure/storage/blobs/storage-blob-storage-tiers#archive-access-tier-preview>

QUESTION 2

You create an Azure Storage account named contosostorage.

You plan to create a file share named data;

Users need to map a drive to the data file share from home computers that run Windows 10.

Which port should be open between the home computers and the data file share?

- A. 80
- B. 443
- C. 445
- D. 3389

Correct Answer: C

QUESTION 3

DRAG DROP

You have an Azure subscription that contains two virtual networks named VNet1 and VNet2. Virtual machines connect to the virtual networks.

The virtual networks have the address spaces and the subnets configured as shown in the following table.

Virtual network	Address space	Subnet	Peering
VNet1	10.1.0.0/16	10.1.0.0/24 10.1.1.0/26	VNet2
VNet2	10.2.0.0/16	10.2.0.0/24	VNet1

You need to add the address space of 10.33.0.0/16 to VNet1. The solution must ensure that the hosts on VNet1 and VNet2 can communicate.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

On the peering connection in VNet2, allow gateway transit.

On the peering connection in VNet1, allow gateway transit.

Create a new virtual network named VNet1.

Recreate peering between VNet1 and VNet2.

Add the 10.33.0.0/16 address space to VNet1.

Remove peering between VNet1 and VNet2.

Remove VNet1.

Answer Area

Empty answer area boxes.

Correct Answer:

Actions

On the peering connection in VNet2, allow gateway transit.

On the peering connection in VNet1, allow gateway transit.

Create a new virtual network named VNet1.

Empty action boxes.

Remove VNet1.

Answer Area

Remove peering between VNet1 and VNet2.
Add the 10.33.0.0/16 address space to VNet1.
Recreate peering between VNet1 and VNet2.

Step 1: Remove peering between Vnet1 and VNet2.

You can't add address ranges to, or delete address ranges from a virtual network's address space once a virtual

network is peered with another virtual network. To add or remove address ranges, delete the peering, add or remove the

address ranges, then re-create the peering.

Step 2: Add the 10.33.0.0/16 address space to VNet1.

Step 3: Recreate peering between VNet1 and VNet2

QUESTION 4

HOTSPOT

You need to recommend a solution for the data store of the historical transaction query system. What should you include in the recommendation? To answer, select the appropriate options in the answer area;

NOTE: Each correct selection is worth one point.

Hot Area:

Sizing requirements:

	▼
A table that has unlimited capacity	
A table that has a fixed capacity	
Multiple tables that have unlimited capacity	
Multiple tables that have fixed capacity	

Resiliency:

	▼
An additional read region	
An availability set	
An availability zone	

Correct Answer:

Sizing requirements:

	▼
A table that has unlimited capacity	
A table that has a fixed capacity	
Multiple tables that have unlimited capacity	
Multiple tables that have fixed capacity	

Resiliency:

	▼
An additional read region	
An availability set	
An availability zone	

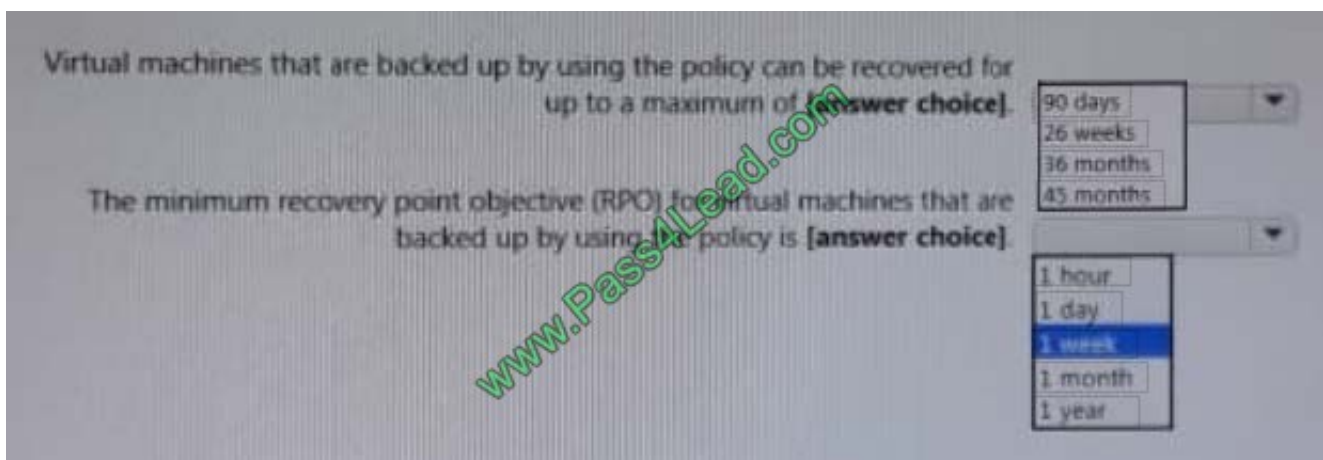

QUESTION 5

You plan to deploy the backup shown in the following exhibit.

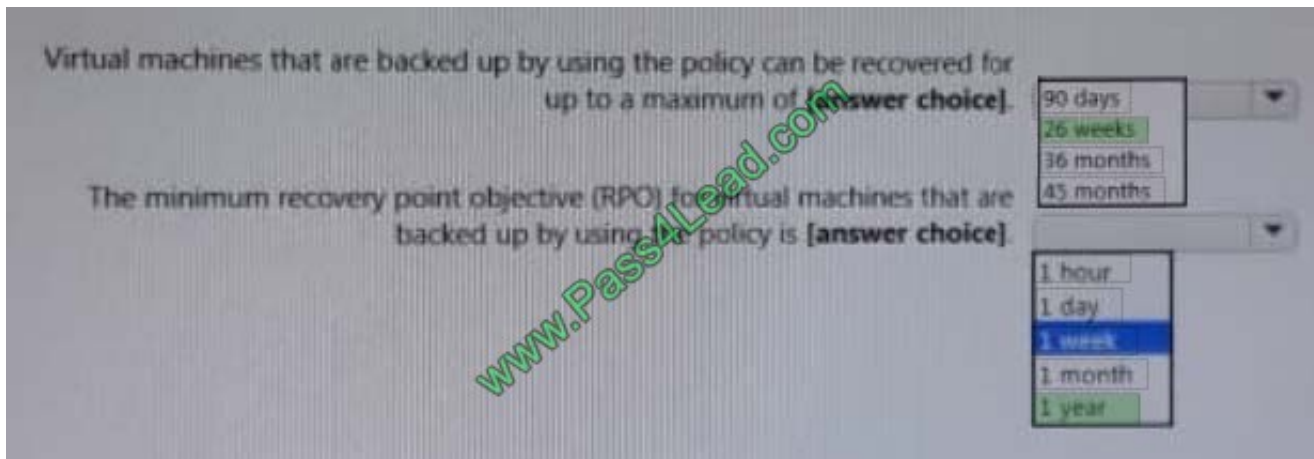

Use the drop-down to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

QUESTION 6

Your network contains an on-premises Active Directory and an Azure Active Directory (Azure AD) tenant.

You deploy Azure AD Connect and configure pass-through authentication? Your Azure subscription contains several web apps that are accessed from the Internet. You plan to enable Azure Multi-Factor Authentication (MFA) for the Azure

tenant. You need to recommend a solution to prevent users from being prompted for Azure MFA when they access the web apps from the on-premises network.

What should you include in the recommendation?

- A. a site-to-site VPN between the on-premises network and Azure
- B. an Azure policy
- C. an Azure ExpressRoute circuit
- D. trusted IPs

Correct Answer: D

QUESTION 7

What should you create to configure AG2?

- A. multi-site listeners
- B. URL path-based routing rules
- C. basic routing rules
- D. an additional public IP address

E. basic listeners

Correct Answer: A

QUESTION 8

DRAG DROP

You plan to import data from your on-premises environment into Azure. The data is shown in the following table.

On-premises source	Azure target
A Microsoft SQL Server 2012 database	An Azure SQL database
A table in a Microsoft SQL Server 2008 database	An Azure Cosmos account that uses the SQL API

What should you recommend using to migrate the data? To answer, drag the appropriate tools to the correct data sources. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll

to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools

- AzCopy
- Azure Cosmos DB Data Migration Tool
- Data Management Gateway
- Data Migration Assistant

Answer Area

From the SQL Server 2012 database:

From the table in the SQL Server 2008 database:

Correct Answer:

Tools

AzCopy

Data Management
Gateway

Answer Area

From the SQL Server
2012 database:

Data Migration Assistant

From the table in the
SQL Server 2008
database:

Azure Cosmos DB Data
Migration Tool

<https://docs.microsoft.com/en-us/azure/dms/tutorial-sql-server-to-azure-sql> <https://docs.microsoft.com/en-us/azure/cosmos-db/import-data>

QUESTION 9

HOTSPOT

You are evaluating the components of the migration to Azure that require you to provision an Azure Storage account.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
You must provision an Azure Storage account for the SQL Server database migration.	<input type="radio"/>	<input type="radio"/>
You must provision an Azure Storage account for the Web site content storage.	<input type="radio"/>	<input type="radio"/>
You must provision an Azure Storage account for the Database metric monitoring.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statements

You must provision an Azure Storage account for the SQL Server database migration.

You must provision an Azure Storage account for the Web site content storage.

You must provision an Azure Storage account for the Database metric monitoring.

Yes

No

QUESTION 10

You maintain an existing Azure SQL database instance. Management of the database is performed by an external party. All cryptographic keys are stored in an Azure Key Vault.

You must ensure that the external party cannot access the data in the SSN column of the Person table.

Will each protection method meet the requirement? To answer, drag the appropriate responses to the correct protection methods. Each response may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Responses

Answer Area

Protection method

Enable AlwaysOn encryption.

Set the column encryption setting to **disabled**.

Assign users to the **Public** fixed database role.

Store column encryption keys in the system catalog view in the database

Response

Response

Response

Response

Response

Correct Answer:

Responses

Yes

No

Answer Area

Protection method

- Enable AlwaysOn encryption.
- Set the column encryption setting to **disabled**.
- Assign users to the **Public** fixed database role.
- Store column encryption keys in the system catalog view in the database

Response

Yes

No

No

No

QUESTION 11

You plan to deploy logical Azure SQL Database servers to The East US Azure region and the Wen US Azure region. Each server will contain 20 database accessed by a different user who reads in a different on premises location. The databases will be configured to use active geo-replication.

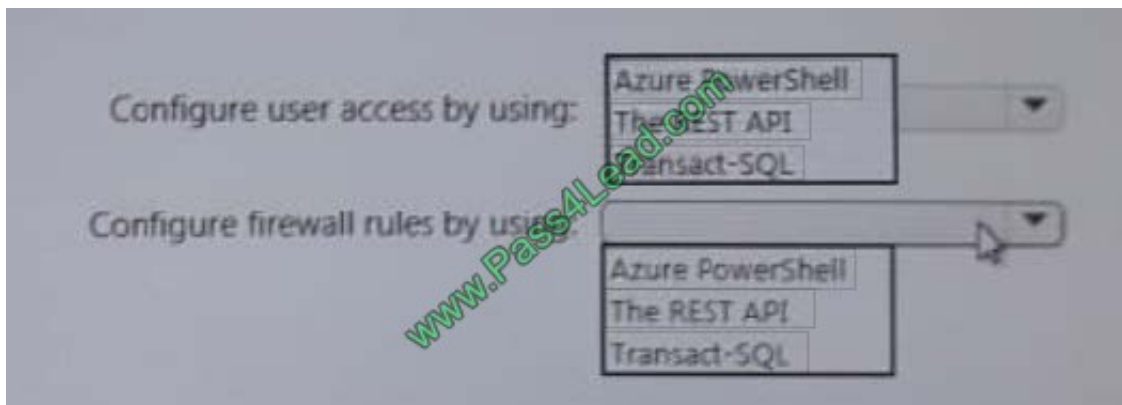

You need to recommend a solution that meets the following requirement:

- Restricts user access to each database
- Restricts network access to each database based on each user's respective location
- Ensures that the databases remain accessible from down applications if the local Azure region fails

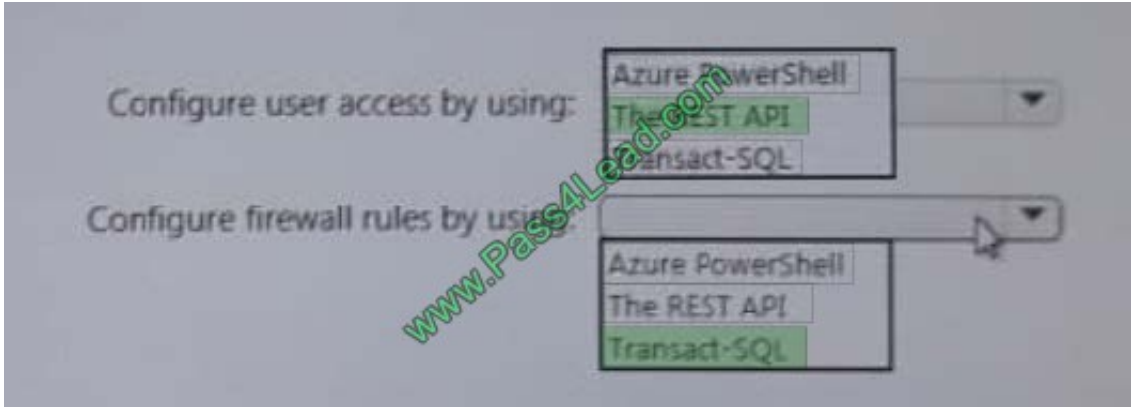

What should you include in the recommendation? To answer, select the appropriate options m the answer area

NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

QUESTION 12

DRAG DROP

You are developing Azure WebJobs.

You need to recommend a WebJob type for each scenario.

Which WebJob type should you recommend? To answer, drag the appropriate WebJob types to the correct scenarios. Each WebJob type may be used once, more than once, or not at all. You may need to drag the split bar between panes or

scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

WebJob types	Answer Area	Scenario	WebJob type
<input type="text" value="Triggered"/> <input type="text" value="Continuous"/>		Run on all instances that the web app runs on. Optionally restrict the WebJob to a single instance.	<input type="text" value="WebJob type"/>
		Run on a single instance that Azure selects for load balancing.	<input type="text" value="WebJob type"/>
		Supports remote debugging.	<input type="text" value="WebJob type"/>

Correct Answer:

WebJob types	Answer Area	Scenario	WebJob type
<input type="text" value="Triggered"/> <input type="text" value="Continuous"/>		Run on all instances that the web app runs on. Optionally restrict the WebJob to a single instance.	<input type="text" value="Continuous"/>
		Run on a single instance that Azure selects for load balancing.	<input type="text" value="Triggered"/>
		Supports remote debugging.	<input type="text" value="Continuous"/>
